

Samsung Phone – Export & Email Instructions

1. Complete your scan/return session and tap the Export button.
2. Wait for the file to finish downloading.
 - A message may appear at the bottom of the screen saying “Download Complete.”
 - Some Samsung phones may also ask if you want to Open or View the file.
3. Open the Samsung “My Files” app.
 - On most phones, swipe up from the home screen and search for:
My Files
4. Inside My Files:
Tap:
Internal Storage
→ Download
5. Look for the newest file.
 - The file will usually end in:
.xlsx
 - Examples:
PickupDeliver.xlsx
Returns.xlsx
Incoming.xlsx
6. Press and hold the file name until a checkmark appears.
7. Tap Share.
 - The Share button is usually at the bottom or top of the screen.
8. Choose your Email app.
 - Usually Gmail or Outlook.
9. Send the file to the email address provided on the web page.
 - If needed, use the “Copy Email” button on the web page first.
10. Tap Send.

Important:

- If the file does not appear immediately, wait a few seconds and refresh the Downloads folder.
- On some Samsung phones, Chrome may ask whether to Open or Download the file. Either option is okay as long as the file finishes downloading.
- If Share is not visible, tap the 3 dots in the corner for more options.
