

Truck Audit Utility

Scan serials • Compare to inventory • Send results

<https://chris-tools.github.io/Inventory-Tools/>

1. **Enter your Technician Name** and **Contractor Firm / Garage**.
2. Tap **Select Inventory File**, then choose the file provided by the warehouse.
 - You will see **"Inventory loaded"** along with the total expected serials.
 - All expected items will appear in the **Missing** list.
3. Tap the blue **Scan** button to begin scanning.
 - Aim the **red line** directly at the barcode or QR code.
 - Hold steady until the scan completes.
 - The scan will appear in the **Last Scanned** box.
 - Tap **Scan** again to confirm and move it into the results list.
 - Tap **Finished** when you are done scanning.
4. As you scan:
 - **Found** = items successfully scanned from the list
 - **Missing** = items not scanned
 - **Extra** = items not on the inventory list
5. Tap **Copy Email** so it's ready to paste into the **To:** field.
6. Tap **Export Audit Results** to generate your audit file.
 - If the **Share sheet** appears, choose **Email** (or Mail).
 - If a file preview appears, tap **Share** or **More...**, then choose **Email**.
7. Paste the email address into the **To:** field.
8. Send the email with the attached audit file.

How to Save Your Inventory File to Your Phone

iPhone Instructions

- Open your email that contains the inventory file.
- Tap on the file attachment.
- Tap the Share icon (square with an arrow pointing up).
- Scroll down and tap 'Save to Files'.
- Choose 'On My iPhone' or iCloud Drive.
- Tap 'Save'.
- Your file is now saved and ready to upload into TAU.

Android Instructions

- Open your email that contains the inventory file.
- Tap on the file attachment.
- Tap the Download icon (down arrow) or 'Save'.
- Open your Files or My Files app.
- Locate the Downloads folder.
- Confirm your file is there.
- Your file is now saved and ready to upload into TAU.

Note: Some Samsung/Chrome devices may automatically download the exported audit file instead of opening the Share screen. If this happens, open the downloaded file and use Share to email it.
